Dilute Russell's Viper Venom Time (dRVVT) based Lupus Anticoagulant detection system

**Application**
For screening and confirmation of Lupus Anticoagulants in plasma

**Sensitivity**
Phospholipid dependant Lupus Anticoagulants

**Specificity**
Not affected by contact and antihaemophilic factor deficiencies or corresponding inhibitors

**Reagents**
- **Screening Reagent**
  Phospholipids Lyophilised with dRVV
- **Confirmation Reagent**
  Enriched Phospholipids Lyophilised with dRVV
- **Calcium Chloride**
  Ready to use 0.025M solution, insensitive to heparin upto 0.4 IU/ml

**Normal Range**
- With Screening Reagent 28 - 45 seconds
- With Confirmation Reagent, 28 - 40 seconds
- Results may also be expressed as Ratio

**Storage / Stability**
2-8°C, 12 months

**In Use Stability**
Reconstituted stability 2-8°C, 5 days for screening and confirmation reagent
